do-it-yourself
Greens Blower Kit

ASSEMBLY AND INSTRUCTION MANUAL

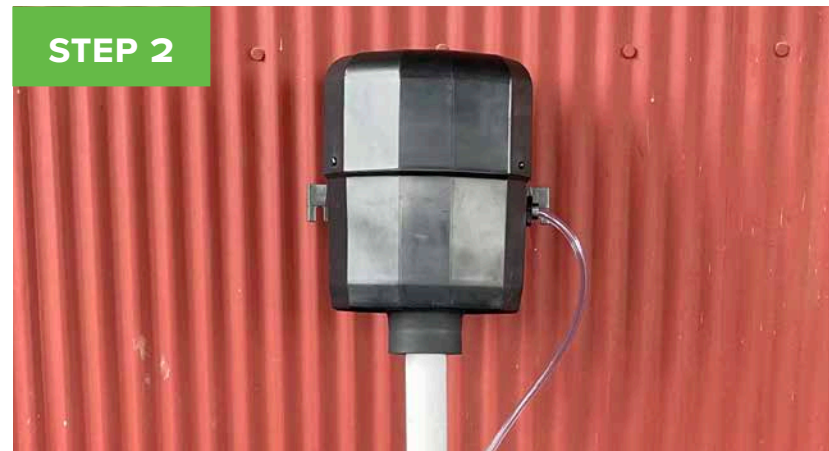

This kit includes:

- 1 × Blower
- 1 × Air button and bracket
- 1 × 5 ft of 1/8-in ID vinyl tubing
- 6 × 1-in #10 sheet metal screws
- 4 × Tubing clips

Assembly Guide

1. Use the sheet metal screws to attach the button bracket to a convenient location on the tub's rim.
2. Slip the blower over 1-1/2" PVC air supply pipe (or 1-1/2" bushing adapter).
3. Insert one end of the 1/8" vinyl tubing into the port on the side of the blower and the other end into the air button.
4. Place the clips over the tubing and attach them to the tub's rim using the sheet metal screws.

Design Tips

Tub

- We recommend using the 110 gallon Tuff Stuff tub which can be found at Tractor Supply Co. If selecting another tub, look for one around 20" deep.

Air Manifold

- Aim for an even distribution of air pipes.
- Drill 1/8" holes at an even spacing. 3" works well. If you use a smaller tub, you may have to drill larger and/or more holes to keep the blower from overheating.
